- Charger: Charging base for parent unit
- User manual

Power
- Battery voltage: 4.8 V
- Charging time: 14 hours hr
- Operating time on battery: 12 hr
- Rechargeable

Product highlights

Sound level lights
Sometimes its a great help to 'see' when your baby makes a sound. This row of lights provide you with a clear visual indication.

Rechargeable parent unit
Putting the parent unit on the charging base will automatically start recharging of the batteries, so it's always ready for portable use.

Range in open air
In the open air with no obstacles, the safe distance between the baby unit and parent unit is greater than indoors, so you can take the parent unit with you into the garden or to the neighbour's house without losing contact.

Charging base
Thanks to the built in battery charger in the base, you get extra freedom (when fully charged) to take the parent unit with you around the home and stay in touch with your baby. It' s also a convenient place to store the parent unit, and ensure it's always ready for use.

Number of channels
A choice of channels significantly reduces the risk of interference or sounds from other baby monitors in the neighbourhood.

Volume control
A handy rotary control sets the volume to the ideal level to suit your preference.

Use in & around the house
Rest assured that as you take the parent unit with you as you move in and around your house, the parent unit will stay in touch with the baby unit. It keeps you reassuringly informed and able to respond quickly when baby calls.

Analogue Pilot Tone
A special tone that is transmitted along with the audio signal minimises the chance of interference from other wireless appliances.
